TOP STORIES

CDT Audit Cites Progress Amid 'High-Risk Deficiencies'
An audit of the California Department of Technology found that the agency had shown improvement in its information security stance since a 2013 review, but that more effort was needed to safeguard state systems. READ MORE

Cities Experiment with Parking Fees to Wrangle Scooters
A three-month pilot program in several cities is charging scooter operators parking fees when the devices go unused. The hope is that the charges will discourage over-deployments of the devices. READ MORE

Forensic Logic Announces Nationwide Crime Search Tool

A San Francisco Bay Area company has combined a well-known law enforcement search engine, Coplink, with its proprietary data analysis software to make a smarter platform for sharing information and solving cases. READ MORE

QUESTION OF THE DAY

What could be more unnerving than a regular flamethrower?
ANSWER

CONTENT PROVIDED BY VMWARE
How to Simplify Security and Privacy in a Complex Cloud Environment
While multicloud and hybrid cloud computing environments provide compelling benefits for state and local governments, they also complicate the work of preserving data security and privacy. But with a multi-layered, software-defined approach to cybersecurity, agencies can overcome these barriers and work to secure the entire enterprise.
